

TENDER NOTICE

Tender Name: Design and Construction of a Meteorological Research Facility

Tender No: MI-2023-002

The Meteorological Institute invites sealed tenders from eligible contractors for the Design and Construction of a Meteorological Research Facility. The facility will include laboratory and office spaces, as well as storage facilities for meteorological equipment and instruments. The facility should be designed and constructed to meet international meteorological standards, with particular attention paid to energy efficiency and environmental sustainability.

The scope of work includes the design and construction of the facility, including all associated civil, electrical, and mechanical works. The contractor will also be responsible for the supply and installation of all necessary equipment, as well as the commissioning of the facility.

Interested bidders should possess a valid trading license and have experience in designing and constructing similar facilities for meteorological institutes or scientific research institutions. Bidders must also provide evidence of their financial and technical capabilities to undertake the project.

A mandatory site visit is scheduled for interested bidders on [insert date and time]. The tender documents can be obtained from the institute's procurement office during office hours or can be downloaded from the institute's website [insert website link]. The deadline for submission of tenders is [insert date and time].

Late tenders will not be accepted, and the institute reserves the right to reject any or all tenders without giving any reason.

For further information, please contact the Procurement Manager on [insert contact details].
